> Whether we like it or not has got nothing to do with the case, and we had as well face this fact soon as late that unless the girl of the future can help out on the money question, there will be mighty few wedding bells. The working girl must continue after mar-riage at her job and add her salary to her husband's. The home keeping girl who has no way of making money, must bring her dowry with her to the altar or else there'll be no weddings.

And this state of affairs is no reflect tion on the young men. It is simpl bread, and cheese, and kisses an economic necessity brought about b forces for which they are not responsi the man has to bear all the expenses

No matter how much a woman loves a man, it is always humiliating to her to have to go to him for every cent she spends. No matter how generous! he is to her, it galls her pride to the quick to know that she has nothing of her own, that if she wants to help her she has to take his money to do it

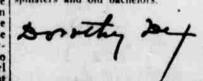

If a woman has one vestige of independence of character, she yearns for financial independence just as much as a man does. Every father ings and automobiles. Every father should settle on his daughter a dowry when she marries, or else the should have some good trade by which she can make money.

And if you ask where this money is to come from for the girl's dowry, I say from the same place that it comes from in European countries.
